

## IN GENERAL:

I've been not in able to add any offer and pricing.

Every time I've tried to add or change anything on offer and pricing of the offer it was not stored.

## LANGUAGE MANAGEMENT IN ALL TABLE

Is it possible to automatically change the language of all the fields in the same form once I click on one of them?

It simplifies the filling and reduce the possibility of error.

The screenshot shows the 'Edit offer' form with a dark blue background. The form has several fields: 'Name', 'Description:', 'Category:', 'Hotel:', and 'Services:'. Each field has a language selection dropdown menu with options: IT, ES, NL, DE, FR. A red arrow points from the 'Name' language dropdown to the 'Description:' language dropdown, and another red arrow points from the 'Description:' language dropdown to the 'Category:' language dropdown. The 'Description:' field is expanded, showing a rich text editor with a toolbar and two paragraphs of text in Italian. The 'Category:' dropdown is set to 'Cupón', the 'Hotel:' dropdown is set to 'Landmar Costa Los Gigantes', and the 'Services:' dropdown is partially visible.

## BACK END

### CITY TABLE:

- We need to have the option to choose the CITY code as is it now for the front end.
- We need to have the option to add the airport for the return

### OFFERS/PRICE MANAGEMENT TABLE:

- There's no way to delete a day pricing as it was before

## FRONT END ERRORS

### Calculation module:

- **FLIGHT:**
  - o if I select flight without filling the "Origen" field, the platform goes ahead when I click on "Ir a la cotizacion" instead to communicate the missing information

- **CALENDAR FIELD**

- When I put a date restriction in the offer, instead to remove the date on the combo, we should see that date with a script like “not available” or “availability over”

- **CALCULATION of Multirooms is wrong:**

- See the example:
  - The price per person for the room “CAMERA 1 adult, 1 copil, 1 infant is 80,00
  - The right total should be:
    - $80,00 \times 2 = 160,00$  = price of the Room for single usage
    - $160,00 \times 2 = 320,00$  = price of the Room for 2 night
    - Right TOTAL is 320,00
